

Smart

I-CON IS ON YOUR SMARTPHONE

The **configuration app**, available for Android and iOS, makes it **simple, immediate and intuitive** to start up and maintain the charging station, giving the possibility to **update the firmware or perform diagnostics from a smartphone** without opening the charging station. It also allows the user to **configure charging settings as desired**.

Less is more

SPACE SAVING DESIGN

The **special design of the mobile connector** and the possibility to mount the product flush make it **the most compact on the market**.

LOWER INSTALLATION COSTS

All wallboxes are **equipped with DC Leakage protective devices** as a standard, according to regulations, in order to **avoid expensive additional devices*** to the wallbox.

*RCD protection not included

LESS IMPACT ON ENVIRONMENT

Sustainability and environmental impact are the cornerstone of this new product range. I-CON is composed of recycled raw materials.

Installation flexibility

Not just intuitive, safe and convenient to use, I-CON is also **easy** to install and maintain; it is guaranteed for indoor **and** outdoor use and allows **various installation** scenarios.

I-CON

A refined and functional design, Wallbox **I-CON** is designed to be perfectly integrated into **private and domestic environments** and to recharge any standard compliant electric vehicle currently available on the market.

Intuitive, ergonomic and simple

MORE COMFORTABLE, ONLY ONE HAND IS NEEDED

Thanks to "one-handed recharge" functionality, it is possible to insert the plug in its socket using only one hand: this feature makes the e-driver user experience more comfortable and easy.

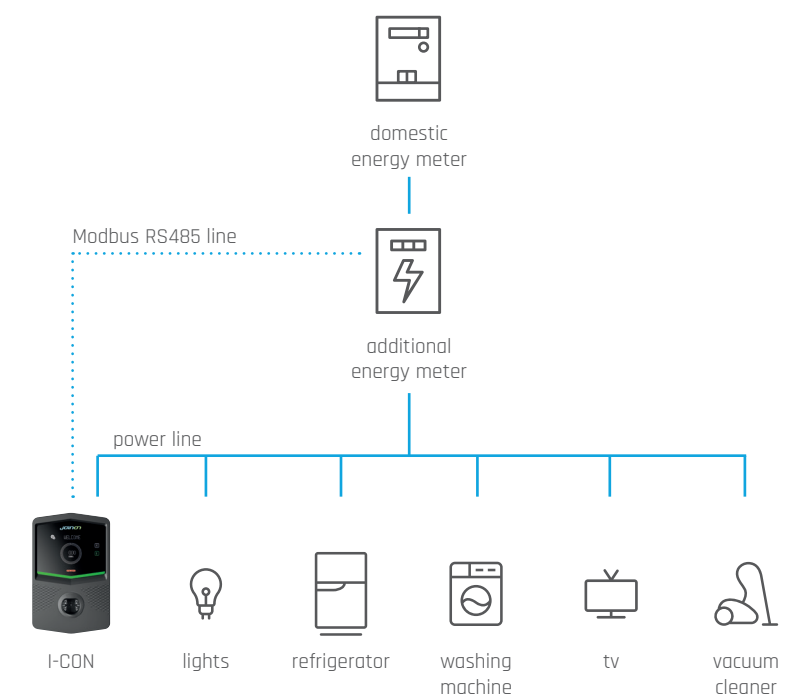

SIMPLE AND INTUITIVE INTERFACE

I-CON also has an innovative user interface, composed by a **display and touch slider** that makes it possible to **view messages** and **manage charging settings locally**, immediately and intuitively.

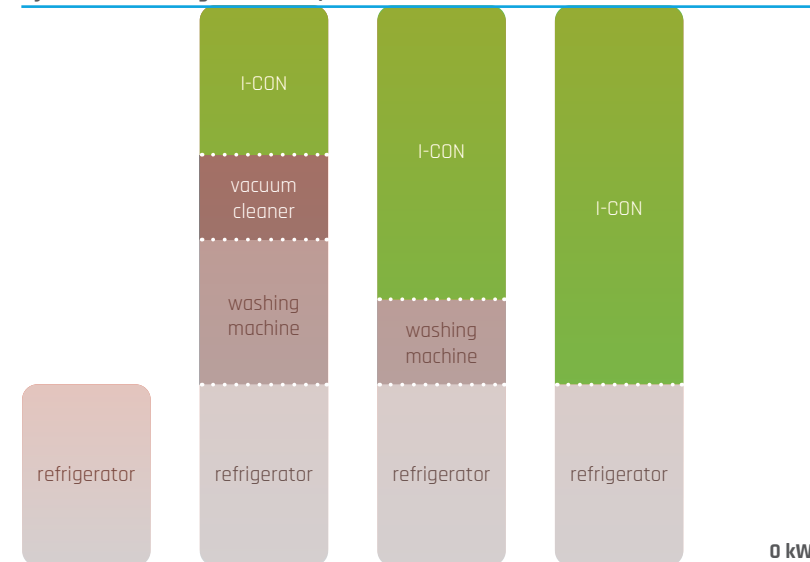

Avoid a blackout at home

INTELLIGENT CHARGING MANAGEMENT

Designed specifically for home charging, **the innovative Gewiss DLM** (Dynamic Load Management) system makes it possible to charge your electric vehicle at the **maximum available power** in your home, **avoiding** the worry of **exceeding the limit** contracted with your Energy Provider. **The Wallbox dynamically raises or lowers the charging power**, according to other household loads (home devices, lights and other...).
